In the 1980s and early 1990s, WordPerfect dominated the word processing market running under Microsoft DOS.. These converters and filters are designed to help you convert and import data from older versions of Office into Office 2003 as well as importing older formats that were in popular use under the DOS operating system.. Several converters are available for older ASCII, not Unicode text files, as well as a converter for the Word 97 format.
